

## ASSESSMENT 2.0 SERVICE

Enhanced, continuous assessment and workload planning improves upon traditional infrastructure assessments

A Govplace Assessment 2.0 will give your team the tools and knowledge to continuously assess your infrastructure, make physical or virtual environment decisions, and optimize workloads to reduce hardware expenditures. A Govplace Assessment 2.0 will also provide the foundation for a Workload Optimization Practice – which is a must have for any datacenter with virtualization.

### Deliverables

- Installation of a sophisticated assessment tool to analyze your infrastructure – your complete heterogeneous environment
- Govplace trains your team to use the workload profiling, analysis and planning tool. Your team is trained to self assess and optimize server workloads
- The assessment and planning tool is left in place and your team has the foundation of a true workload planning system

### Benefits

- Your team is trained to continuously self-assess and optimize your environment
- Minimize risk by assessing your environment over time
- Cost savings due to workload optimization – reduce new hardware purchases by moving workloads to underutilized resources

### The Govplace Difference

- Exclusive public sector focus and experience assessing and optimizing data centers for government and education
- Govplace understands the technology buying cycle and purchase timing of public sector customers and develops solutions like this to meet their needs
- Extensive knowledge of data center optimization
