

BACKUP ASSESSMENT SERVICE

Optimize your backup and recovery process for maximum results and protection

Quantify and Define Your Backup and Restore Efficiency

Typical recommendations reduce risk, maximize existing investments and provide a roadmap for future growth. Govplace's Backup Assessment is designed to ensure consistent, high performance, extremely reliable backup and recovery.

Deliverables

- Strategic and tactical recommendations
- Technology roadmap, including timing resource requirements, performance metrics and results
- Logical topology diagram.
- Policies, processes, patches, tools needed to maximize backup and recovery
- Guidelines for performing future backup and restoration assessments.

Benefits

- Get a clear picture of your backup environment
- Get an objective assessment of your backup and restoration processes
- Identify the current state of your recovery readiness, potential problem areas and vulnerabilities
- Leverage Govplace technical knowledge, public sector experience and industry best-practice expertise to improve your backup and restoration process
- Reduce the risk of not being able to restore your mission-critical data
- Improve your recovery response and maximize your IT investments

The Govplace Difference

- Exclusive public sector focus and experience in assessing, designing, deploying and managing backup and restoration solutions for government and education entities
- Extensive technical knowledge of backup and restore systems and processes
- Highly trained and certified Govplace engineers can quickly diagnose problems and suggest solutions
- Knowledge of new technologies and processes that can be leveraged to improve your backup and restoration processes
